SUMMARY

Automation Test Engineer with 5+ years of experience specializing in Tricentis Tosca for Web, API, Desktop, and SAP applications. Proven track record of reducing manual regression effort by up to **40%** through reusable automation frameworks and data-driven testing strategies. Strong expertise in TCD, TDS, TQL, and DEX with hands-on experience in CI/CD integration using Jenkins and Azure DevOps.

TECHNICAL SKILLS

Automation & Testing: Tricentis Tosca Automation, Test Case Design (TCD), Test Data Service (TDS), Data Driven Testing (DDT), API Testing (REST / SOAP), SAP Testing, Regression, Functional, GUI Testing

Tools & Technologies: Tricentis Tosca, Postman, Power BI, SAP.

Database: MySQL

CI/CD Tools: Jenkins and Azure DevOps

Methodologies: Agile Scrum, SDLC, STLC.

CERTIFICATIONS

- Tricentis Automation Specialist Level 1 & 2
- Automation Engineer Level 1
- Test Design Specialist Level 1
- API Testing

PROFESSIONAL EXPERIENCE

International Battery Company | Tosca Automation Engineer

Jun 2024 – Jan 2026

Project: ETroc

- Designed and implemented reusable Tosca automation components, improving test reusability by ~30%
- Automated **SAP SD business processes** including Order-to-Cash (OTC), covering sales order creation, delivery, billing, and invoice validation
- Designed Tosca test cases for **SAP GUI and SAP Fiori applications**, improving coverage across SD modules
- Built data-driven test frameworks using TCD & TDS, reducing manual effort in regression cycles

- Executed large-scale automation suites using Tosca DEX, optimizing execution time
- Performed API testing (REST/SOAP) and improved defect detection in early stages
- Increased automation coverage from 40% to 75% across critical modules

Next Cloudwave Solutions | Tosca Automation Engineer

Jan 2023 – May 2024

Project: Mapfre Insurance

- Developed scalable Tosca automation scripts and reusable test step blocks
- Automated regression test suites, improving execution efficiency and coverage
- Integrated API validation and SQL checks for end-to-end testing
- Reduced manual validation effort by implementing automated database verification
- Enhanced test stability and maintainability through structured automation design

VHS Consulting India | Automation Test Engineer

Apr 2022 – Dec 2022

Project: Adidas

- Built and maintained Tosca-based automation scripts for functional and regression testing
- Supported automation framework enhancements and stability improvements
- Contributed to increased automation coverage across key application modules
- Collaborated with cross-functional teams in Agile environments to ensure quality delivery

KEY ACHIEVEMENTS

- Reduced manual regression testing effort by up to **40%** through automation
- Reduced regression execution time by **50%** by automating **200+** test cases
- Built scalable automation frameworks supporting multiple application types (Web, API, SAP)
- Strengthened defect detection through integrated API and database validation

EDUCATION

BBA – Bangalore University (2015–2018)
